TECHNICAL SKILLS

Languages:

Python — Intermediate (syntax, loops, functions, basic problem solving)

C++ — Intermediate (fundamentals, conditional logic, loops, basic programs)

JavaScript — Beginner-Intermediate (DOM manipulation, basic logic, ES6 basics)

Frontend:

HTML5 (semantic structure, forms, layouts)

CSS3 (box model, flexbox, basic responsiveness)

Bootstrap (grid system, responsive design)

JavaScript (Frontend) (DOM events, interactivity)

React.js — Learning (components, props, basic hooks)

Backend:

Node.js — Learning

Express.js — Learning

REST API — Basics (request/response flow, endpoints)

Databases:

MongoDB — Basic (collections, documents, CRUD operations)

Tools & Technologies:

Git & GitHub (basic version control)

VS Code (development environment)

Bruno (API testing)

Postman — Basic

Flutter — Learning

PERSONAL STATEMENT

I am a software engineering student building strong foundations in full-stack web development and API testing. My technical strengths include frontend development using HTML, CSS, Bootstrap, and JavaScript, along with beginner-level backend development using Node.js, Express.js, and MongoDB.

I am currently enhancing my skills through structured learning programs, including the Python for Everybody Specialization (University of Michigan) and the Meta Front-End Developer Professional Certificate (Coursera). These courses are helping me strengthen my programming fundamentals, frontend development skills, and real-world application building.

I am seeking an internship opportunity to apply my skills in real-world projects, gain practical experience, and continue growing as a full-stack developer.

PROJECTS

Expense Tracker Fullstack | [github repo link](#) | April 2026-april 2026

What I did: Built a full-stack expense tracker web application that allows users to add, manage, categorize, and track their daily expenses through an interactive and responsive interface.

- **Tech Stack and Frameworks used:** React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, CSS.
- **Problem Solved / Use Case:** Helps users monitor their spending habits, organize expenses by category, and maintain better financial tracking through a simple dashboard-based system.
- **Impact / Usage (if any):** Created as a practical full-stack learning project to strengthen frontend-backend integration, database handling, and real-world CRUD application development skills.
- **Challenges Tackled / Learning Outcome:** Improved understanding of React component architecture, state management, API integration, MongoDB database operations, Express routing, form handling, authentication basics, CRUD operations, responsive UI design, and full-stack application structuring.

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering) 2023-2027 Campus: Jaipur | Bachelor's enrollment: BCA Honors Manipal University Jaipur

ACHIEVEMENTS & EXTRACURRICULARS

- Actively preparing for hackathons and coding competitions
- Maintains GitHub repositories with JavaScript and frontend projects
- Regularly practices problem-solving and builds self-initiated projects
- Continuously learning through industry-relevant courses (Python & Frontend Development) • Fitness and strength training, demonstrating discipline and consistency

CERTIFICATIONS (IN PROGRESS)

- **Python for Everybody – University of Michigan (Coursera)**
- **Meta Front-End Developer Professional Certificate – Coursera**
- **AI/ML Certification Program by E&ICT Academy, IIT Roorkee**
